ISO 9001:2015 QUALITY MANAGEMENT SYSTEM

The ISO 9000 family of international quality management standards and guidelines has earned a global reputation as the basis for establishing quality management systems. ISO 9001 provides a framework and systematic approach in managing business processes to produce a product / service that conforms to customer expectations. The fundamentals of the Standard make the company more efficient and increase the competitive edge.

ISO 9000 is recognized worldwide. ISO 9001 certification indicates to the customers that you have a quality management system in place. They know you have a corrective action system, a system to handle complaints and non-conformances. They know that you are continually addressing problems and improving your operations and performance.

ISO 14001:2015 ENVIRONMENT MANAGEMENT SYSTEM

ISO 14001 is a standard for environment management system. It is applicable to every type of organisation regardless of the size, structure or turnover. A properly designed EMS allows efficient identification of opportunities for cost savings. It can trigger procedural and/or technological changes that reduce the total cost of a product or prove its value.

OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT SYSTEM - OHSAS 18001:2007

OHSAS 18001 is a standard for occupational health and safety assurance system. It was formulated to help organizations for establishing occupational health and safety policies and objectives. The standard is applicable to any organizations that wish to take a proactive approach to its occupational health and safety risks. A certified Occupational Health and Safety Management System demonstrate the conscious determination of the organization to safeguard the employees and the environment from harmful incidents.

HACCP HAZARD ANALYSIS CRITICAL CONTROL POINT / ISO 22000:2005 FOOD SAFETY MANAGEMENT SYSTEM

The food chain needs to demonstrate its ability to control food safety hazards in order to ensure that food is safe at the time of human consumption.

It is applicable to all organizations, regardless of size, which are involved in any aspect of the food chain and want to implement systems that consistently provide safe products. The means of meeting any requirements of ISO 22000/ HACCP can be accomplished through the use of internal and/or external resources.

ISO 27001:2013 INFORMATION SECURITY MANAGEMENT SYSTEM (ISMS)

ISO/IEC 27001 is the formal standard against which organizations may seek independent certification of their Information Security Management Systems (meaning their frameworks to design, implement, manage, maintain and enforce information security processes and controls systematically and consistently throughout the organizations). The standard covers all types of organizations (e.g. commercial enterprises, government agencies and non-profit organizations). It specifies the requirements for establishing, implementing, operating, monitoring, reviewing, maintaining and improving documented ISMS within the context of the organization's overall risk management processes. It specifies requirements for the implementation of security controls customized to the needs of individual organizations or parts thereof.

CE MARKING

CE marking is a declaration by the manufacturer that the product meets all the appropriate provisions of the relevant legislation implementing certain European Directives. CE marking gives companies easier access into the European market to sell their products without adaptation or rechecking. The initials "CE" do not stand for any specific words but are a declaration by the manufacturer that his product meets the requirements of the applicable European Directive(s).

TVE CERT has cooperation with many notified bodies who are in CE certification Services. We are providing CE certification services through these bodies depending on the customer requirements. Some of the products we cover are electrical goods, medical devices, construction products, machinery, pressure vessels etc.
